

THE ROMAN CATHOLIC DIOCESE OF ROCKVILLE CENTRE

St. Agnes Cathedral (Exterior), Rockville Centre, New York

HE²PD, Inc. was retained as Program Manager for the full restoration of the Cathedral façade. Since the intent of the project was to bring the Cathedral's façade back to its original condition, careful attention was taken to match the existing historic brick and stone when the west turret was rebuilt, in addition to masonry, several deteriorated windows, and the bell tower was repaired and replaced.

A strict budget was created and maintained throughout the project. The project was completed in two major phases over the course of eighteen months without interruption to their daily mass.
