

EXPERIENCE

ALBERT EINSTEIN COLLEGE OF MEDICINE Bronx, New York

HE2PD has been retained for a variety of assignments at the Albert Einstein College of Medicine on the Yeshiva University Campus. Totalling 6,000,000 SF, the University occupies more than 36 buildings and contains a variety of nationally-recognized laboratory facilities. HE2 is responsible for the permit and violation management of all Einstein facilities and has assisted the school in its acquisition of CON approvals from the NYS Department of Health campus-wide. We have also assisted Einstein in the acquisition of NYSERDA grants for Energy Savings. The firm has acted as liaison for the University in its negotiation of legal disputes with former vendors and is currently working with the facilities department for the development of its ARRA Grant projects. We are actively involved in the planning of future facilities and are frequently called upon to advise and assist the staff in its program management and facilities development.

Our services have been retained by Albert Einstein College of Medicine for over 7 years. Recently completed projects are the conversion of the Main Power Plant from #6 Fuel Oil to #2 Fuel Oil and the consolidation of the 36,000sf Children's Evaluation & Rehabilitation Center facility into one new location in the Van Etten Building.
