

EXPERIENCE

OBSTETRICS / GYNECOLOGY / NICU New York Methodist Hospital Brooklyn, NY

HE2PD provided Program Management Services to New York Methodist Hospital during the complete renovation of it's OB/GYN facility. The project was built in 26 Phases to allow for the continual operation of the facility during construction. The new 36,000sf OB/GYN unit consists of Labor & Delivery Suites, Procedure Rooms, and a Neo-natal Intensive Care Unit.

The project demanded tight coordination with the entire operational staff. We worked closely with the Facilities Department, Infectious Disease Control and the DEP & DOH to ensure complete compliance with all governing agencies.
