

ALBERT EINSTEIN COLLEGE OF MEDICINE

Bronx, New York

HE²PD, Inc. was retained for a variety of assignments at the Albert Einstein College of Medicine on the Yeshiva University Campus. Totalling 6,000,000 SF, the University occupies more than 36 buildings and contains a variety of nationally-recognized laboratory facilities.

HE²PD, Inc. was responsible for the permit and violation management of all Einstein facilities and assisted the school in its acquisition of CON approvals from the NYS Department of Health campus-wide. We have also assisted Einstein in the acquisition of NYSERDA grants for Energy Savings. The firm acted as the liaison for the University in its negotiation of legal disputes with former vendors and worked with the facilities department for the development of its ARRA Grant projects. HE²PD, Inc. was actively involved in the planning of future facilities and were frequently called upon to advise and assist the staff in its program management and facilities development.

Albert Einstein College of Medicine retained our services for over 7 years. Completed projects include the conversion of the Main Power Plant from #6 Fuel Oil to #2 Fuel Oil and the consolidation of the 36,000 SF Children’s Evaluation & Rehabilitation Center facility into one new location in the Van Etten Building. It was the first of the updating projects taking place in the 350,000 SF Van Etten Building once acquired by Einstein College of Medicine.
